

II. Amendments to Claims

Please amend claims 7-10 & 15-37 previously on file as follows:

Claims 1-6 (Previously Cancelled)

 7. (Previously and now Currently Amended) A method for providing a ~~quantity of pre-paid telephone time~~ pre-assigned PIN number from a POS terminal in communication with an electronic clearing house, to a patrons of said POS terminal, without such POS terminal contacting a telephone service provider prior to, during, or after dispensing said second PIN number to said patron, to permit said patron access via said PIN number to a fixed quantity of prepaid telephone time from said telephone service provider, comprising in combination:

- a) ordering a pre-determined amount of telephone time from a plurality of telephone service providers, and further obtaining from each telephone service provider a plurality of groups of second PIN numbers, each of said second PIN numbers when provided to a patron of such POS terminal during a transaction and subsequently supplied by the patron to the telephone service provider adapted to allow telephone service for said patron for a pre-determined quantity of time, each of said second PIN numbers having associated therewith a pre-determined quantity of time for which telephone service will be enabled, said pre-determined quantity of time associated with second PIN numbers within one group of said plurality of groups being different from the pre-determined quantity of time associated with second PIN numbers within another of said groups of unique second PIN numbers;
- b) querying a patron of such POS terminal, who accesses the POS terminal by providing the POS terminal with an encoded card

and a first PIN number, as to whether the patron wishes to purchase telephone time;

- EU
DT
- c) in response to a positive reply to the aforesaid query, providing the patron with a plurality of telephone service providers to select from;
 - d) providing to the patron a plurality of pre-defined quantities of telephone times which may be purchased, and requesting the patron select a particular pre-defined quantity of telephone time;
 - e) in response to input from said patron as to the quantity of time selected, querying said patron as to whether the patron desires to charge the patron's credit card or debit the patron's bank account;
 - f) in the event that the patron desires to charge the patron's bank account, verifying that the patron has sufficient funds to purchase said quantity of telephone time, and debiting such account;
 - g) in the event the patron desires to charge the patron's credit card, verifying that the quantity of time desired to be purchased may be charged to said credit card, and charging said credit card;
 - h) upon satisfaction of f) or g) above, selecting a second PIN number from a selected group of said plurality of groups of second PIN numbers during the transaction, said selected group corresponding to a group of second PIN numbers associated with said selected telephone service provider and said selected quantity of telephone service time; and
 - i) providing said selected second PIN number to such patron by printing said second PIN number on said POS terminal's existing

account statement printer or alternatively displaying said second PIN number on said POS terminal's visual display.

Please cancel claim 8.

9. (Original) The method as claimed in claim 8 7, said step of verifying that the patron has sufficient funds to purchase said quantity of telephone time comprising verifying sufficiency of such funds through an electronic clearing house communicating with said POS terminal.

10. (Original) The method as claimed in claim 9, said step of verifying that the quantity of time desired to be purchased may be charged to said credit card comprising verifying through said electronic clearing house communicating with said POS terminal.

Claims 11-14 (Previously Cancelled)

15. (Previously and now Currently Amended) A method for providing a pre-assigned second PIN number ~~fixed quantity of pre-paid telephone time~~ from a device comprising a conventional automated teller machine (ATM) or a point-of sale (POS) terminal, having a display screen and printing capability and a pre-existing communication capability with an existing computer system operated by a financial institution ~~such as a bank~~, to a patron of said device who accesses said device through provision to said device of an encoded card and first personal identification number (PIN), without hardware modifications to said device, hardware additions to said existing system, or additional communication links to a telephone service provider, to permit said patron access via said second PIN number to a fixed quantity of prepaid telephone time from said telephone service provider, comprising the steps of:

- a) making available to said device a plurality of said pre-assigned second PIN numbers, each of said second PIN numbers adapted, when provided by said patron during a telephone call to a said telephone service provider, to allow telephone

service for the patron for a period of time up to said quantity of pre-paid time, the plurality of second PIN numbers being grouped into a plurality of groups of second PIN numbers, each group of second PIN numbers corresponding to a different quantity of time to be purchased;

- b) querying said patron of said device as to whether the patron wishes to purchase telephone time;
- c) verifying that the patron has sufficient funds to purchase said quantity of telephone time, and charging such funds for said quantity of time;
- d) upon satisfaction of c) above, selecting one of said plurality of second PIN numbers from one of said groups of second PIN numbers; and,
- e) printing said selected second PIN number and providing it to such patron via an account statement printer used in association with said device, ~~without contacting the telephone service provider,~~ without such device contacting the telephone service provider prior to, during, or after the dispensing of said second PIN number from said device.

16. (Previously Added) The method as claimed in claim 15, wherein said ~~funds~~ funds comprise funds held by said patron in a bank account.

17. (Previously Added) The method as claimed in claim 15, wherein said funds comprise funds which may be advanced by charging a credit card.

18. (Previously Added) The method as claimed in claim 15,

further comprising the step after step b) of:

in response to input from said patron as to whether the patron desires to purchase telephone time, querying said patron as to whether the patron desires to charge the patron's credit card or to debit the patron's bank account;

in the event that the patron desires to charge the patron's bank account, verifying through an electronic clearing house that the patron has sufficient funds to purchase said quantity of telephone time, and charging said bank account for said quantity of time, and

in the event the patron desires to charge the patron's credit card, verifying through an electronic clearing house that the quantity of time desired to be purchased may be charged to said credit card, and charging said credit card for said quantity of time.

19. (Previously Added) The method ~~for~~ [for] providing a fixed quantity of pre-paid telephone time from a device as claimed in claim 15, said step of making said second PIN numbers available to said device comprising storing said second PIN numbers on a database which is capable of being accessed by said device.

20. (Previously Added) The method for providing a quantity of pre-paid telephone time from a device as claimed in claim 19, said plurality of second PIN numbers comprising a plurality of groups of second PIN numbers, each second PIN number in a respective group of said groups of second PIN numbers permitting telephone service for a pre-determined quantity of time, each second PIN number within a respective group providing a different quantity of pre-paid telephone time than second PIN numbers within another group, further comprising the steps of:

querying said patron in step b) as to what quantity of a number of predefined quantities of telephone time such patron wishes to purchase; and

in response to input from said patron as to the particular quantity of telephone time desired to be purchased, selecting a second PIN number from a respective group of second PIN numbers which provides telephone time corresponding to the particular quantity of pre-defined quantities of telephone time selected by said patron.

21. (Previously Added) The method for providing a quantity of pre-paid telephone time from a device as claimed in claim 20, wherein said plurality of second PIN numbers are ordered from and provided by said telephone service provider.

22. (Previously Added) The method for providing a quantity of pre-paid telephone time from a device as claimed in claim 21;

said step of ordering a plurality of PIN numbers from said telephone service provider comprising ordering a number of groups of second PIN numbers, the number of groups of second PIN numbers being equal to said number of pre-defined quantities of telephone time.

23. (Previously Added) The method for providing a quantity of pre-paid telephone time from a device as claimed in claim 22, further comprising, after or at the same time as step a), querying the patron of said device as to whether the patron wishes to purchase telephone time from a selected list of telephone service providers.

24. (Previously and now Currently Amended) A method for providing a second PIN number ~~quantity of pre-paid telephone time~~ from a device comprising a conventional point-of sale (POS) terminal or automated teller machine (ATM) which is operatively connected to an existing computer system operated by a financial institution ~~such as a bank~~, to a patron of said device, without hardware modifications to said device, hardware

additions to said existing system, or additional communication links to a telephone service provider, to permit said patron access to a fixed quantity of prepaid telephone time from said telephone service provider via said second PIN number and without said device contacting said telephone service provider prior to, during, or after dispensing said second PIN from said device, comprising the steps of:

- 24
- a) ordering a pre-determined amount of telephone time from a plurality of telephone service providers, and further obtaining from each telephone service provider a plurality of groups of second PIN numbers, each of said second PIN numbers adapted, when provided to a patron of such device and subsequently supplied by the patron to the telephone service provider, to allow telephone service for said patron for a pre-determined quantity of time, each of said second PIN numbers having associated therewith a predetermined quantity of time for which telephone service will be enabled, the plurality of second PIN numbers being grouped into a plurality of groups of second PIN numbers, each group of second PIN numbers corresponding to a different quantity of time to be purchased~~said pre-determined quantity of time associated with second PIN numbers with in one group of said plurality of groups being different from the pre-determined quantity of time associated with second PIN numbers within another of said groups of unique second PIN numbers;~~
- b) querying a patron of such device, who accesses the device by providing the device with an encoded card and a first PIN number, as to whether the patron wishes to purchase telephone time;
- c) in response to a positive reply to the aforesaid query, providing the patron with a plurality of telephone service providers to select from;
- d) providing to the patron a plurality of pre-defined quantities of telephone times which may be purchased, and requesting the patron select a particular pre-defined quantity of telephone

time;

- e) verifying that the patron has sufficient funds to purchase said quantity of telephone time, and debiting such funds,
- f) upon satisfaction of e) above, selecting a second PIN number from a selected group of said plurality of groups of second PIN numbers, said selected group corresponding to a group of second PIN numbers associated with said selected telephone service provider and said selected quantity of telephone service time, and
- g) providing said selected second PIN number to such patron ~~without contacting the telephone service provider~~ via an existing account statement printer or visual display associated with such device.

25. (Previously Added) The method as claimed in claim 24, wherein said funds constitute funds held by said patron in a bank account.

26. (Previously Added) The method as claimed in claim 24, wherein said funds constitute funds which may be advanced by charging a credit card.

27. (Previously Added) The method as claimed in claim 24, further comprising the step after step b) of:

in response to input from said patron as to whether the patron desires to purchase telephone time, querying said patron as to whether the patron desires to charge the patron's credit card or to debit the patron's bank account;

in the event that the patron desires to charge the patron's bank account, verifying through an electronic clearing house that the patron has

sufficient funds to purchase said quantity of telephone time, and charging said bank account for said quantity of time, and

in the event the patron desires to charge the patron's credit card, verifying through an electronic clearing house that the quantity of time desired to be purchased may be charged to said credit card, and charging said credit card for said quantity of time.

Please cancel claim 28.

29. (Previously Added) The method as claimed in claim 28 24, said step of verifying that the patron has sufficient funds to purchase said quantity of telephone time comprising verifying sufficiency of such funds through said electronic clearing house communicating with said device.

30. (Previously Added) The method as claimed in claim 29, said step of verifying that the quantity of time desired to be purchased may be charged to said credit card comprising verifying through said electronic clearing house communicating with said device.

31. (Previously and now Currently Amended) A method for crediting, via a device comprising a conventional POS terminal or an ATM, having pre-existing communication capability with an existing computer system operated by a financial institution ~~such as a bank~~, a quantity of predetermined telephone time to a patron who possesses a wireless telephone having a pre-assigned telephone number, which permits said patron, after the initial provision by said patron of a second personal identification number (PIN) to a telephone service provider, to thereafter utilize said telephone ~~for~~ for a period up to said quantity of pre-determined quantity of telephone time without having at the time of each subsequent telephone call to provide said telephone service provider with said second PIN number prior to being permitted to make said telephone call, without hardware modifications to said device, hardware additions to said existing system,

or ~~additional~~ communication links to a said telephone service provider, which comprises in combination:

- 14
- DX
- a) initially providing a plurality of said second PIN numbers to said device, each of said second PIN numbers being determined prior to a patron attempting to utilize said device to purchase telephone time ;
 - b) ~~a)~~ querying a patron of said device, who accesses said ~~terminal~~ device through provision to the ~~terminal~~ device of an encoded card and a first personal identification number (PIN), as to whether the patron wishes to purchase telephone time and what quantity of telephone time,
 - c) ~~b)~~ querying said patron as to said quantity of time desired to be purchased,
 - d) ~~c)~~ verifying that the patron has sufficient funds to purchase said desired quantity of telephone time;
 - e) ~~d)~~ debiting such ~~fiends~~ funds;
 - f) ~~e)~~ selecting said second PIN number from a plurality of second PIN numbers, each of said second PIN numbers adapted, when supplied by said patron during a telephone call to a telephone service provider, to allow telephone service for the patron for a period of time up to said quantity of purchased time, the plurality of second PIN numbers being grouped into a plurality of groups of second PIN numbers, each group of second PIN numbers corresponding to a different quantity of time to be purchased;
 - g) ~~f)~~ providing said selected second PIN number to such patron via an existing account statement printer or visual display associated with such device, without said device contacting the telephone service provider prior to, during, or after dispensing said second PIN number to said patron;

h) ~~g)~~ receiving said second PIN number from said patron;

i) ~~h)~~ correlating the pre-assigned telephone number of said wireless telephone with a corresponding account held by said telephone service provider in respect of said patron; and

j) i) crediting said account with said quantity of pre-determined telephone time purchased by said patron as ascertained from said second PIN number.

32. (Previously Added) The method as claimed in claim 31, wherein such funds constitute funds held by said patron in a bank account.

33. (Previously Added) The method as claimed in claim 31, wherein said funds constitute funds which may be advanced by charging a credit card.

34. (Previously Added) The method as claimed in claim 31, further comprising the step after step b) of:

in response to input from said patron as to whether the patron desires to purchase telephone time, querying said patron as to whether the patron desires to charge the patron's credit card or to debit the patron's bank account;

in the event that the patron desires to charge the patron's bank account, verifying through an electronic clearing house that the patron has sufficient funds to purchase said quantity of telephone time, and charging said bank account for said quantity of time; and

in the event the patron desires to charge the patron's credit card, verifying through an electronic clearing house that the quantity of time desired to be purchased may be charged to said credit card, and charging said credit card ~~for~~ for said quantity of time.

Please cancel claim 35.

36. (Previously Added) The method as claimed in claim 31,
wherein
said wireless telephone possesses a specific frequency and
identification code;

said second PIN number is received from said patron by way of
a telephone call from said patron on said wireless telephone;
and

said pre-assigned telephone number is correlated to said
account of said patron when said telephone call is received
from said patron.

37. (Previously Added) The method as claimed in claim 36, said
telephone number of said wireless telephone ascertained by said telephone
service provider at the time said patron communicates said second PIN
number to said service provider, said service provider thereafter matching
said telephone number with said account and subsequently crediting said
account with said predetermined quantity of telephone time.
